

Green Homes Sheffield Host

Further information

Host address:	103 Cross Lane, Crookes S10 1WN
---------------	---------------------------------------

More information about this home

The house is a stone fronted terraced house typical of the area, and I was keen to preserve the stone front whilst improving energy efficiency. The improvements have made the house much warmer and more comfortable and have also reduced energy bills substantially. The house was awarded a C rating in a recent EPC assessment.

Low carbon measures on show

-  **Low-cost improvements** e.g. loft insulation, cavity wall insulation, draught proofing, basic heating controls
-  **'Big' insulation works** e.g. internal wall insulation, external wall insulation, floor insulation, loft conversion, flat roof insulation,
-  **Glazing:** e.g. secondary glazing, triple glazing, high performance doors, refurbished sash windows.

Further info:

- Internal insulation to the front wall of a terraced house, covering the ground floor front room and the main bed-room on the first floor.
- Quadruple glazing in main bedroom and front room.
- Underfloor insulation below the front room.
- Cavity insulation in off-shot kitchen and bathroom.
- Loft Insulation around attic room.
